**INGROUND GALLERY**

A swimming pool  
at your home creates a  
personal oasis  
for relaxation  
and a gathering  
place for family  
and friends.

Your swimming pool will  
not only make you  
popular on those hot  
summer days (when  
everyone tends to think  
of who they know with a  
pool), but will provide  
you with a sound  
investment to your  
property, along with a fun  
place to improve the health of  
you and your family with  
exercise, and the incomparable  
relaxation of lounging in the water.

# IPG<sup>MD/™</sup>

---

In theory, swimming pools are a simple concept; they're big basins of water. However, the highly developed engineering of today means that you have a wide range of options for your backyard retreat. IPG offers various shapes and sizes for the actual swimming pool. Once you combine that with the landscaping of the surrounding area, you have created a uniquely distinct addition to your home.

Say goodbye to traveling to splash in the water, no more enduring the heat on those hot summer days, and you get to enjoy the spontaneity of dipping in refreshing water whenever the mood arises.

With the assistance of your IPG professional, you will have your swimming pool dream organized into reality through a few decisions on what defines your idea of a backyard resort. The shape and size of a pool comes in so many variations that you will be able to find the option that you have pictured in your imagination. The pool edging, called coping, will accommodate whatever option of decking you require, whether bullnose or cantilevered. Your decisions for lighting and the option of a winter cover will be an integral part of your coping design.

**Your IPG professional has**

**INVISI** SEAL

Providing the BEST liner seaming technology available in the industry. Whether you've got some basic pool desires or you're more inclined to have the most pristine design, you will be able to combine the numerous options for an exceptional addition to your home.

All MIG welded connections have a zinc rich coating applied. MIG welding is the strongest method used in the industry which adds filler material opposed to using base material to join surfaces.

Strong continuous stiffening angle (not flat strip) encapsulated by a safety bend is used to hold panels to a true radius.

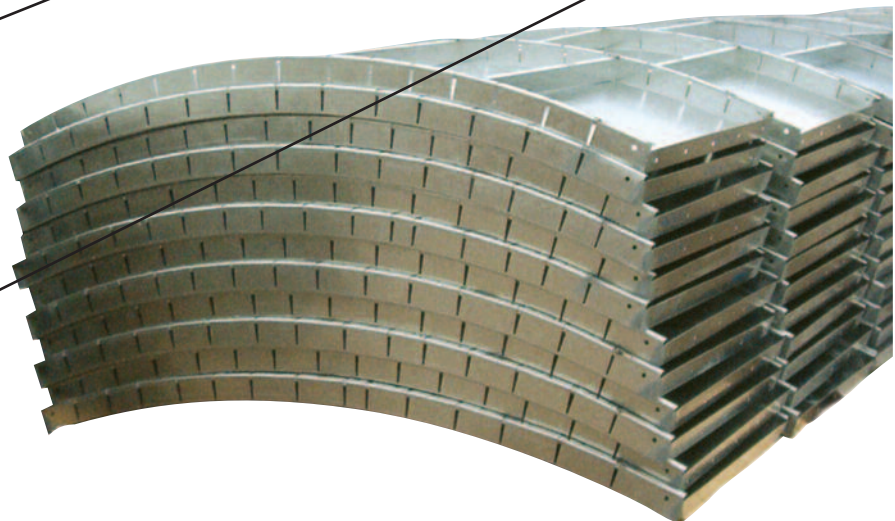

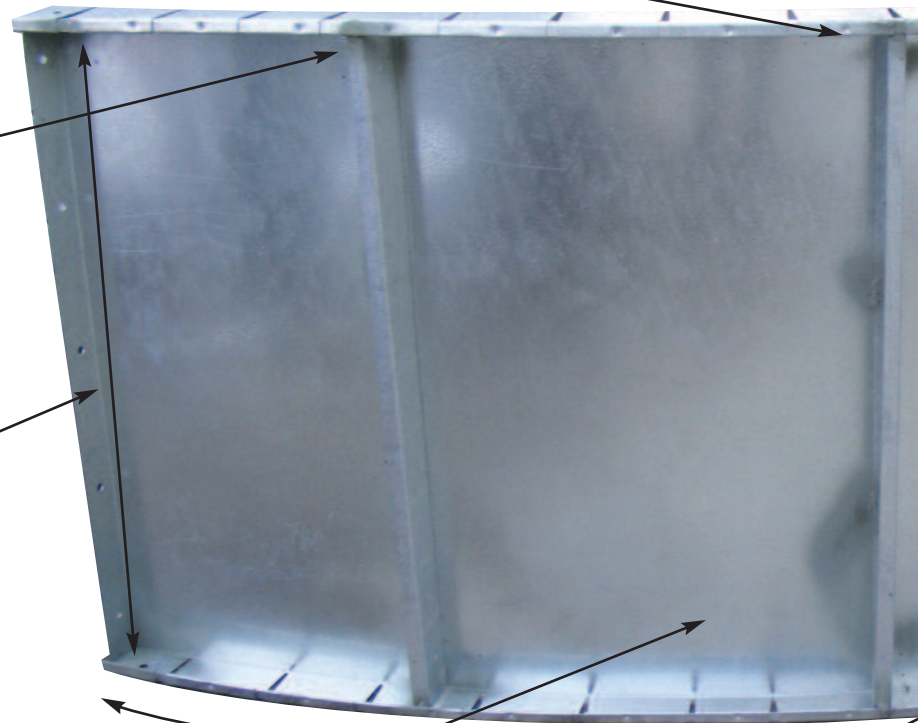

Available in 42" or 48" wall height

Up to 8'0" lengths to reduce panel joints and bolting

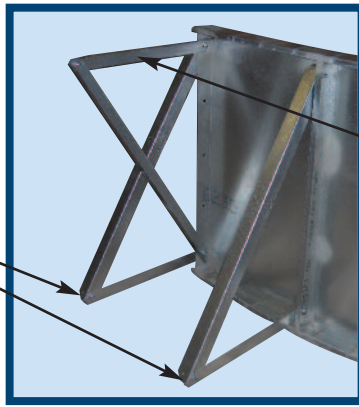

Heavy 14 gauge ASTM 526 steel with z720 galvanic coating for long galvanize corrosion protection

24" maximum gusset spacing for extra strength and stiffness which provides more locations for deck supports.

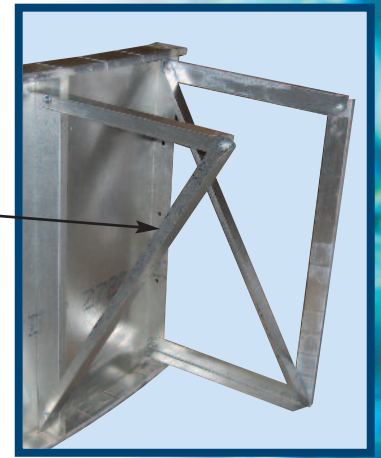

Sturdy 2" x 2"  
A-Frame stiffening  
system at panel joints.

### Deck support options

(1) Inverted A-Frame  
Simple system using same  
hardware as A-Frame

### (2) Deck support system

Vertical channel will support more load and does not direct load to face of panel.

# COPING

Coping is the cap around the edges of your pool, locking in the liner and sealing to the deck surrounding your pool. You can have the basic single track coping, a double track product that accommodates an optional fitted winter cover, or a triple track that is needed for the optional fibre optic lighting.

The colour of your coping will generally match the colour of your stairs. The finishing edging that will bring together your complete pool concept is available in white, grey or black, depending on the series.

## Your options for coping can be categorized into four different styles:

- **Bullnose** - Most commonly used; provides a clean, smooth finish. With this style, the coping acts as the form for the concrete deck. Available in white or grey.
- **Face Cap Coping** - A wide, bright and clean looking perimeter to your pool. This model works similar to bullnose but has a decorative PVC cap to finish the face. Available in white or grey.
- **Cantilevered Stone** - A distinct natural finish option that allows stone or tile to sit on top using either a top mount or front mount coping.
- **ProFORM** - A more elegant and natural look by using a top mount coping, which allows face of concrete deck to be exposed to pool and has less maintenance compared to cantilevered stone.

Find Out more at [www.ipgpools.com](http://www.ipgpools.com)

# ProFORM

This product line offers flexibility in customizing the look of your pool atmosphere. A collar can be built-in around the pool perimeter, and any colour can be selected to achieve a desired look. Ask your IPG professional how ProForm can be incorporated with your pool design.

Is a profile with a unique stamped pattern, providing a natural cut stone look. It is an excellent compliment to any stamped concrete finished deck, presenting the complete look and feel of stone, while maintaining its durability and maintenance-free qualities.

Classic offers a fresh classic cantilevered look with a smooth, clean and crisp finish.

Offers a smooth bullnose finish

ProEdge provides a contemporary finish to your cantilevered edge.

## Pool Model and Size

Creating your very own personal resort starts with choosing the model and size of your pool. While looking through our available options, keep in mind the space you have available for the pool, taking into account how the pool area will fit in with your existing landscaping.

Also, narrow down the selections by deciding whether you like the look of clean straight lines, like our Rectangle or Roman models, or curvy flowing lines, like our Odyssey or Rainbow models. Your IPG professional has the ability to create ANY custom shape or size pool uniquely match your dreams.

### Common Sizes:

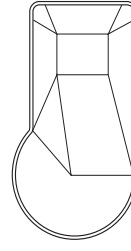

10' x 20'  
 12' x 24'  
 14' x 28'  
 16' x 32'  
 18' x 36'  
 20' x 40'

# Our Liners Will Make You Proud:

Our exclusive method of liner welding using **Invisiseal Technology** provides the best liner. Invisiseal produces virtually undetectable welds that result in stronger welds, smoother corners and no bar marks. Your IPG Dealer Liners come standard in 30 ga. for an unsurpassed liner thickness on BOTH floor and wall. Raleigh Blue print is also available in 40 ga. wall.

- Made with 100% virgin vinyl, consisting of UV protectors and algae inhibitors
- Advanced computer aided vinyl cutting equipment ensures a true fitting liner
- All liners backed with a lifetime warranty

While we have a number of liner patterns to choose from, we'd like you to choose a pool liner that will appeal to your senses, complement your home and tie in with the overall look surrounding your swimming pool. We offer this extensive liner collection to be sure we are addressing everyone's preferences and delivering the various style options for backyard living.

While looking over our liner collection start by deciding whether you're better suited to a light coloured liner or a dark coloured liner. Once the water is in the pool, the liner colour will appear more subdued. The browns and black are popular options for a natural look while the blues represent a more pool-like appearance.
